

# Gamberi Elia

Consultant Developer // Ruby on Rails Expert

Mid-level software engineer focused on Ruby on Rails and modern web development, with experience modernizing SDLC practices through CI-CD, automated testing and Docker in team settings

## Experience

**MAR 2021 - DEC 2023 | ENGIM SRL**

### Lead Developer

Lead Developer driving technology modernization by introducing CI-CD, automated tests, and Git, while contributing leadership within a small developer group.

**DEC 2023 - APR 2025 | WIDEGROUP**

### Backend Developer - DevOps

Backend Developer - DevOps focused on SDLC modernization, implementing CI-CD, Docker, automated testing, and workflow improvements before moving to the Motor Team on RCA insurance work

**APR 2025 - CURRENT | GEKO CODE**

### Consultant Developer

Freelance developer on web development and automation initiatives, including work with Engim Srl on Qtygest, contributing to project delivery and continuous technical improvement

## Education

2018 - CURRENT | UNIMORE

### Bachelor's Degree - Computer Science

2014 - 2018 | SCIENTIFIC HIGH SCHOOL - APPLIED SCIENCES

### High School Diploma

## Projects

### Modena.rb

Modena.rb is a local meetup, that aims to create a network of enthusiastic Ruby developers, that like to share their passion for code. We meet every month, and at every meetup, one of us gives a short talk to share an experience that everyone can learn from. If you are interested, you can join here: [invite link](#).

### Rubycon

From Modena.rb, we decided that we needed a big event to share our passion even more. So, we created Rubycon: an Italian Ruby Conference, for an international audience, with a heavy roman theme. Thanks to everyone who organized this, you can find all of them in the [Rubycon Blog](#)

## Technical Knowledge

Ruby on Rails is my go-to framework for web development, but I always try to find new technologies that better suit the issues that I'm facing. This continuous search allowed me to learn a lot of new languages, frameworks and templates.

## Skills

Backend: Ruby on Rails  
Delivery: CI-CD, automated testing,  
Docker; Web development;  
Collaboration; Leadership; Problem-solving; Continuous learning

I love writing beautiful code, something that I can be proud of having worked on. This is also the main reason that made me enjoy Ruby on Rails so much.

I think that every good developer should be lazy to enjoy automated developer tools, like CI-CD, Automated Tests and Docker, which I always try to implement from the get-go.
